

# Tool Factory Mini Musical Monsters

Follow the Cloud--Karaoke for early learners!  
Click the monster underneath the cloud  
and follow as the cloud moves from one  
monster to another to make a well-known tune.

Monster Grid--Make short tunes and rhythms  
by dragging the monsters into different parts  
of the grid and pressing play! You can even  
record your fun songs to play back for a friend.

Monster Match--Teaches children to listen  
carefully and discriminate sounds. Match the top  
row of monsters with a monster from below,  
first with visual help and then by sound alone!

Monster Mixer--Drag the monsters up or down  
to make their individual, looping part in  
a simple musical arrangement louder or softer.  
The sounds change each time you enter the game!

Monster Scale--The monsters in this game  
represent the notes of an octave. Record yourself  
playing a fun and original tune and play  
it back to hear what you've created!

Musical Garden--Click anything in the garden or  
anywhere on the keyboard  
to create startling and fun sounds that  
go along with colorful animation.
